			Y 59m +?	Y 230m + 27m	+? is unknown
			Y	Y	
			Y* Y	Y	Y* = Linux-virt
			Y		
			Y		
			Y		
			Y		
			Y		

0m, includes false start of build all with 60G disk that did most of the work before failing with full disk
includes idle time between tests

an on RPi5

or timeout for RPi5, MY = yes after manual workaround

time to build missing linux-msg-amp-v2, did not for ec2 arm, did not measure for ec2 x86

io-msg-amp-v2 not in linux build all list, worked from saved image, Y = still ok after building this

k
